EDUCATION

Ph.D., Biochemical & Molecular Nutrition *Jun 2016 - Aug 2019*
Tufts Friedman School of Nutrition Science and Policy, Boston, MA

M.S., Biochemical & Molecular Nutrition, with concentration in Systems Genomics *Sep 2014 - May 2016*
Tufts Friedman School of Nutrition Science and Policy, Boston, MA

B.S., Chemical Engineering – *Magna cum laude* *Sep 2010 - May 2014*
Tufts University, Medford, MA

RESEARCH EXPERIENCE

Instructor

Jul 2022 - present

Postdoctoral Fellow

Sep 2019 - Jun 2022

Massachusetts General Hospital, Boston, MA
Broad Institute of MIT and Harvard, Cambridge, MA
Harvard Medical School, Boston, MA
Advisor: Alisa K. Manning, Ph.D.

Develop methods for gene-environment interaction analysis in large-scale consortia and biobanks, including TOPMed and the UK Biobank. Apply these methods to nutrition and lifestyle exposures to find potential genetic modification of the relationship between these behaviors and cardiometabolic disease risk. Implement and share open-source software tools, cloud workflows, and analysis results to advance the field and promote reproducible science.

Doctoral Student

Oct 2016 - Aug 2019

JM-USDA Human Nutrition Research Center on Aging at Tufts University, Boston, MA
Advisor: José M. Ordovás, Ph.D.

Doctoral Thesis: Integration of genomics, epigenomics, and diet for cardiovascular risk prediction

Uncovered novel epigenomic signals predictive of incident cardiovascular disease and assembled associated predictive models. Demonstrated that DNA methylation may act as a “molecular recorder” of cumulative risk factor exposure and that epigenomic risk predictors may be synergistic with traditional risk scores. Provided proof-of-concept for the prediction of response to dietary fat using genome-wide gene-diet interaction results.

Graduate Student

JM-USDA Human Nutrition Research Center on Aging at Tufts University, Boston, MA

Master's Directed Study

Jan 2015 - Dec 2018

Developed a cheminformatic workflow based on quantitative structure-activity relationship machine learning models to discover targeted uses of food compounds. Published an open-source software tool implementing the method and an associated manuscript.

Master's Practicum

Sep 2014 - Jan 2015

Analyzed 16S metagenomic data to uncover dietary effects on murine microbiome patterns.

GRANTS, HONORS, AND AWARDS

K01 Research Scientist Development Award – NIDDK *2022 - present*

Early Career Abstract-based Travel Award – CHARGE Consortium *2024*

Abstract-based Travel Award – Precision Nutrition Forum *2024*

Early Career Abstract-based Travel Award – CHARGE Consortium *2023*

Advocacy Certificate for Human Genetics and Genomics – ASHG	2022
Early Career Investigator Achievement Award – CHARGE Consortium	2022
Early Career Abstract-based Travel Award – CHARGE Consortium	2022
Early Career Educational Travel Award – American Society for Nutrition	2021
Semifinalist, Charles J. Epstein Trainee Award – American Society for Human Genetics	2021
Emerging Leaders in Nutrition Science Award – American Society for Nutrition	2021
Finalist, Postgraduate Research Award Competition – American Society for Nutrition	2021
Harvard T32 Training Program in Endocrinology – NIDDK	2020-2021
BioData Catalyst Fellowship – NHLBI	2020-2021
Gerald Cassidy Student Research Award – JM-USDA HNRCA at Tufts University	2018
IMPACT Fellowship – MIT IMPACT program	2018
Tufts T32 Training Program in Nutrition and Cardiometabolic Disorders – NHLBI	2016-2019
Honos Civicus Society – Tufts University civic honor society	2015

PROFESSIONAL EXPERIENCE

InsideTracker , Cambridge, MA Data Scientist	<i>Jan 2016 - Dec 2019</i>
Analyzed large behavior and blood biomarker datasets from a commercial personalized nutrition platform. Led the statistical modeling and manuscript preparation for the company's first peer-reviewed publication. Developed a software tool for automated analysis and visualization of biomarker data that is now used across the company.	
Tufts Medical Center , Boston, MA Bioinformatician	<i>Jun 2019 - Aug 2019</i>
Consulted on the content of reports for a machine learning-based biological analytics platform being developed within the Tufts Clinical and Translational Science Institute.	
Harvard Medical School , Boston, MA Technical Outreach Coordinator	<i>Jun 2015 - May 2016</i>
Worked with biological research groups to find gaps in computational workflows and identified relevant resources within the IT department; projects ranged from RNA-Seq analysis in R to system administration.

2016

MENTORSHIP AND TEACHING

Mentorship

Julie Gervis, Research Fellow, Massachusetts General Hospital
Mentor on genetic epidemiology and gene-diet interactions.

2023-

Richa Jain and **Rachel Sussman**, Master’s students, Harvard School of Public Health
Co-supervised Health Data Science capstone project (with Dr. Tamar Sofer).

2024

Joanna Lin, Undergraduate, Bowdoin College

2020 – 2021

Mentored on genetic epidemiology and the scientific publication process. Resulted in our co-first author publication exploring gene-environment interactions for COVID-19 severity.

Teaching

Instructor, Harvard School of Medicine

2024

Course: Pathways, Genetics Discipline (PWY 100)

Led 2 classes on polygenic disease mapping and analysis for first-year medical students.

Teaching Assistant, Tufts Friedman School

2015 & 2016

Course: Graduate biochemistry (BCHM 0223)

Independently led twice-weekly review sessions for classes of 15+ students.

UNIVERSITY SERVICE

Founder and organizer, Nutritional genomics discussion group at MGH/Broad Institute

2020 - present

Organizer, Omics in epidemiology journal club

2019 - 2021

Co-founder and Coordinator, “NewTriton” talk series at the Tufts Friedman School

2015 - 2018

Research Working Group Member, Tufts Friedman School Strategic Plan

2015

Research Committee, Tufts Friedman School Student Research Conference

2014 - 2017
